DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Mizukami.

Regarding claim 1, Mizukami (6,581,103) teaches a semiconductor integrated circuit device comprising a semiconductor region of a first conductivity type (16/18 or 111), a first insulated gate field effect transistor formed on the semiconductor region of the first conductivity type and having a source drain region (27/30 or 115/116) of a second conductivity type connected to an output terminal (Vss/105); a semiconductor region (25 or 114) of the second conductivity type formed adjacent to the source/drain region on the semiconductor region of the first conductivity type and connected to the gate (28 or 128) of the first insulated gate field effect transistor. See Fig. 1 or Fig. 5, respectively, column 4 line 13-50; column 1 lines 30-50.

Regarding claim 22, which is identical to claim 1 except for the preamble reciting an electronic card using the semiconductor integrated circuit device delineated in claim 1, the claim is also anticipated and unpatentable over the prior art above for the reasons delineated above with regard to claim 1 anticipating all the claimed elements and for the additional reasons delineated below. The body of the claim following the preamble is a self-contained description of the structure and does not recite any structure limiting the

Art Unit: 2814

electronic card. Kropa v. Robie, 88 USPQ at 480-481. Furthermore, the preamble reciting the use of the claimed invention generally does not limit the claim. Catalina, 62 USPQ2d at 1785.

Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-21, 23-25 are allowed. The prior art do not teach or fairly suggest combination to arrive at the claimed invention in claims 2, 7, 12, 17, and 23-25.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
